QS World University Rankings® EECA Region 2019: Welcome

Selina Griffin
Rankings Manager
QS Quacquarelli Symonds

Welcome to the QS World University Rankings: EECA (Emerging Europe and Central Asia) 2019.

For this edition of the ranking, we have taken the decision to alter the methodology by introducing a new indicator. This new indicator was first trialled in the QS Latin America University Rankings and has now been incorporated into all of our other regional exercises, BRICS excluded. The International Research Network indicator combines robust research data from Elsevier's Scopus database with an international dimension as it considers the international diversity of institutions with which the university has collaborated in its research. The weighting changes that we have made to accommodate this new dimension will be covered in the Methodology section of this supplement.

The EECA ranking results are now based on ten indicators, some of which you may recognise from our World University Rankings exercise, which is published annually in June. Academic and employer reputation form the cornerstone of this ranking, amounting, between them, to 50% of the overall weighting. The status of the reputational indicators in

our methodology reflect the insight that can be offered by over 125,000 datapoints pertaining to academic sentiment and employer feedback. The importance of employer reputation is also of considerable worth to students who perceive their university studies as a conduit to a career.

The other eight indicators of which the EECA methodology is comprised are: Faculty/Student ratio, Papers per Faculty, Citations per Paper, Staff with PhD, proportion of International Faculty and proportion of International Students, web impact and, of course, our latest addition; International Research Network. More details about all of these indicators, what they mean, and how they are used can be found in the Methodology section of this supplement.

We hope that the 2019 edition of our EECA rankings offers compelling, serviceable insight into the region's universities.

THINK BIG.

To us, **THINK BIG** means more than **11,500 students** from over 70 countries worldwide, **100 diverse programmes of study**, including 8 master degrees in cooperation with other leading universities, and **25 research centres** engaged in cutting-edge research. It means being the first university in Europe to achieve **5 QS Stars** for distance learning education, and being recognised as **global leaders in blockchain education**. It means a **leading Medical School** in collaboration with St George's, University of London, offering fully integrated clinical training programmes spanning three continents. But it also means an unforgettable student experience, at the most dynamic, vibrant and **ever-expanding urban campus** in Cyprus.

Welcome to the largest university in Cyprus.

Welcome to the University of Nicosia.

UNIVERSITY of
NICOSIA

QS World University Rankings EECA Region 2019: Overview

Martin Ince

Chair of the Global Academic Advisory Board of the QS World University Rankings
and writer and journalist in the fields of higher education and science

Most QS rankings have a title that requires little explanation. They may be about a subject, from physics to archaeology; or about the whole world; or part of it, perhaps Latin America or the Arab world. But Emerging Europe and Central Asia? What unites this massive area, running from Cyprus and the Baltic to the Himalayas?

We rank the universities of this region as a group because they share common history and more importantly, some possible future direction. Most of the 25 nations whose universities appear here were formerly part of the Soviet Union, or were under its influence during the Cold War. They are now some decades into the process of reorienting themselves into a post-Cold-War world. Some are now members of the EU and NATO while others retain strong links to Russia.

With the (partial) exception of Russia, it is hard for universities in this region to look good in a ranking which also includes the rich, stable nations of Western Europe, East Asia and North America. The top institution in this ranking, Lomonosov Moscow State University, is 90th in the QS World University Rankings and the second entry from the EECA region, Al-Farabi Kazakh National University, is 220th.

This means that the criteria we use to rank universities globally will not prove as illuminative for universities in the EECA region. Instead, we use ten indicators that we hope represent their preoccupations and priorities fairly.

As with the overall QS World University Rankings, we allocate half of each university's possible score in this table to the outcomes of our annual surveys of informed academics and employers. Here, we give a weighting of 30 per cent to the academic survey, and a further 20 percent to our QS Employer Survey. These surveys constitute a uniquely extensive assessment of academic research and teaching power, and incorporate the analysis of over 125,000 people around the world.

This year, Lomonosov Moscow State University ranks strongest in both of these measures. Charles University in the Czech Republic, and Warsaw University in Poland, are second and third when academic opinion is measured. The Employer Survey identifies two technology specialists – Bauman Moscow State University and the Middle East Technical University in Turkey – as second and third for the desirability of their graduates.

Two further indicators are intended to gauge the professionalism of each university and its commitment to its students. They do this by looking at

the percentage of faculty with a PhD and the faculty-to-student ratio of the institutions. Between them, these measures are intended to tell you how likely students are to be taught in small classes by qualified people. The highest proportion of PhDs is at Corvinus University in Budapest, followed by the Technical University of Kosice in Slovakia and the University of Istanbul. Top for faculty/student ratio is the American University in Bulgaria, followed by Tbilisi State University in Georgia and Bauman in Moscow.

Three further indicators look at a university's capacity to produce new knowledge through research. Some of these nations, such as the Czech Republic and of course Russia, have long histories as intellectual, research-producing nations. Others can grow their university capacity rapidly because of mineral wealth.

The three indicators we use are the number of papers produced in the scientific literature by an average faculty member, the number of times their papers are cited, and the amount of publishing carried out jointly with international co-authors, as a measure of its global research network. The most productive faculty is possessed by Slovenia's Nov Gorica University, followed by the Technical University of Ostrava in the Czech Republic and Novosibirsk State University in Russia. Top for citations are two Turkish institutions, Galatasaray and Bilkent, followed by Semmelweis University in Hungary; while Charles University in Czech Republic, the University of Belgrade in Serbia, and the University of Ljubljana in Slovenia are best-connected internationally.

Related to this measure is our indicator of web presence, derived from the Webometrics ranking produced by the CSIC research organisation in Spain. It tells us how committed an institution is to ensuring it enjoys global visibility,

and is topped by Lomonosov Moscow State University, followed by Charles University. Masaryk University, also in the Czech Republic, is third.

Finally, we believe that a good university will attract good academics and students from around the world. However, we are aware that universities in the EECA region are not yet terrific global talent magnets. So international faculty and students ratio contribute only 2.5 percent each to an institution's final score. Top for both is the politically-embattled Central European University in Hungary, set up as a deliberately international institution.

The overall message seems to be that European universities find it easier than those in Central Asia to do well here. But massive resources are being invested into the education systems of these Asian nations, and it would be no surprise to see them in more top places here in years to come.

QS World University Rankings EECA 2019: Methodology

For the QS EECA (Emerging Europe and Central Asia) University Rankings 2019 we have added a new indicator and therefore offer a revised methodology.

This methodology differs from that used for the overall QS World University Rankings®. The unique approach of the regional rankings is based on feedback collected from the region, the expert identification of those factors of most importance to the region's institutions and other tertiary education stakeholders, and the availability of data. Like QS's other rankings, the constituent indicators are designed to measure for key aspects of an institution's mission: teaching, research, employability and internationalization. This latest edition incorporates a new indicator that combines elements of both research and internationalization into one by examining the diversity of an institution's international research collaborations.

From this edition, ten indicators are used to form this regional university ranking:

INDICATORS

Global Reputation

ACADEMIC REPUTATION 30%

Results are derived from the annual survey conducted by QS, which is designed to evaluate the perceptions of academics from around the world regarding the leading research institutions. For this 2019 edition, over 83,000 responses were recorded globally.

EMPLOYER REPUTATION 20%

Derived from the annual QS Employer Survey, which gathers the perspectives of employers worldwide regarding the relative abilities of institutions to provide successful, employable graduates. For the 2019 edition, over 42,000 responses were analysed.

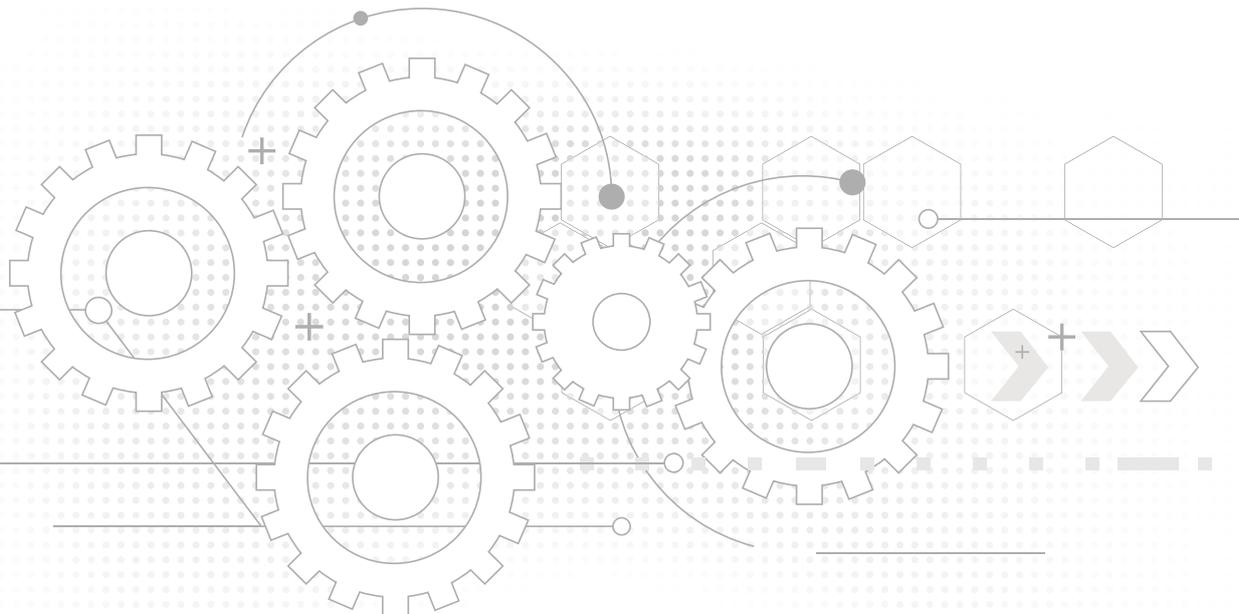

Research

CITATIONS PER PAPERS 5% / PAPERS PER FACULTY 10%

For our regional rankings we adopt a slightly different approach to that used for the overall QS World University

Rankings®. We use two indicators to evaluate the research productivity - in the form of Papers per Faculty - and research impact, through our Citations per Paper indicator. As with the QS World University Rankings®, we are using a publications window of papers published between 2012-2016, and a six year citation window from 2012-2017.

These indicators are calculated using data acquired from Elsevier's Scopus database. Furthermore, only those institutions producing more than 100 papers in the last five years are evaluated in the citations per faculty indicator. The rest of the data is treated in the same way as for the QS World University Rankings®: self-citations are excluded from the analysis, the paper and citation data are normalized, ensuring the citations achieved in each of the five broad faculty areas are weighted equally, and a variable affiliation cap excludes any anomalous results where a paper has an extraordinarily high number of

affiliations for its field.

INTERNATIONAL RESEARCH NETWORK 10% NEW

Using Scopus data and the same publishing window as the rest of the research indicators, this new indicator first appeared in our QS Latin America University Rankings. It has since been incorporated into the other regional evaluations. The indicator uses the Margalef Index to assess the degree of international diversity in terms of research collaboration for each evaluated institution. This indicator combines research with internationalization to offer unique insight into university performance.

Teaching Commitment

STUDENT TO FACULTY RATIO 10%

This is the ratio between the number of academic staff and number of students. A higher number of teachers per student is an indirect indicator of institutional commitment to high-quality teaching. The weighting for this indicator has been reduced from 15% in previous editions to 10% to

accommodate the new International Research Network indicator.

STAFF WITH PHD 5%

The Staff with PhD is a proxy measure for teaching quality. It reflects a university's commitment to ensuring that they are acquiring faculty members with expertise in their field – a commitment that can be expected to lead to improved research and teaching alike.

These two indicators measure a university's commitment to facilitating high-quality interaction between teachers and students.

Internationalization

INTERNATIONAL FACULTY 2.5%

The international Faculty Index measures the proportion of faculty members at an institution that are international. It is a proxy measure for how internationally-attractive the university is to academic staff. Universities based in locations known

for attracting high proportions of expatriates perform well here.

INTERNATIONAL STUDENTS 2.5%

Similar in nature to the International Faculty Index, the International Students Index is based on the proportion of students that are international. It is a proxy measure for how attractive the university is to prospective international students. Attracting international faculty and students can be challenging for institutions that do not yet enjoy strong global recognition.

WEB IMPACT 5%

This indicator seeks to assess the effectiveness with which institutions are making use of new technologies. Baseline information is provided by the Ranking Web of Universities (www.webometrics.info), although the results are refactored to exclude the Excellence indicator, which is already considered in the metrics relating to scientific research. The weighting for this indicator has been reduced from 10% in previous editions to 5% to accommodate the International Research Network indicator.

UniKL
UNIVERSITI
KUALA LUMPUR

“ Empowering Vocational and Technical Minds ”

Universiti Kuala Lumpur (UniKL) was established in 2002 under *Majlis Amanah Rakyat (MARA)*, a Malaysian agency under the Ministry of Rural and Regional Development (KKLW). UniKL provides graduates with the knowledge, skills and attitude required to contribute towards and play major roles in a globalised and knowledge-based economy.

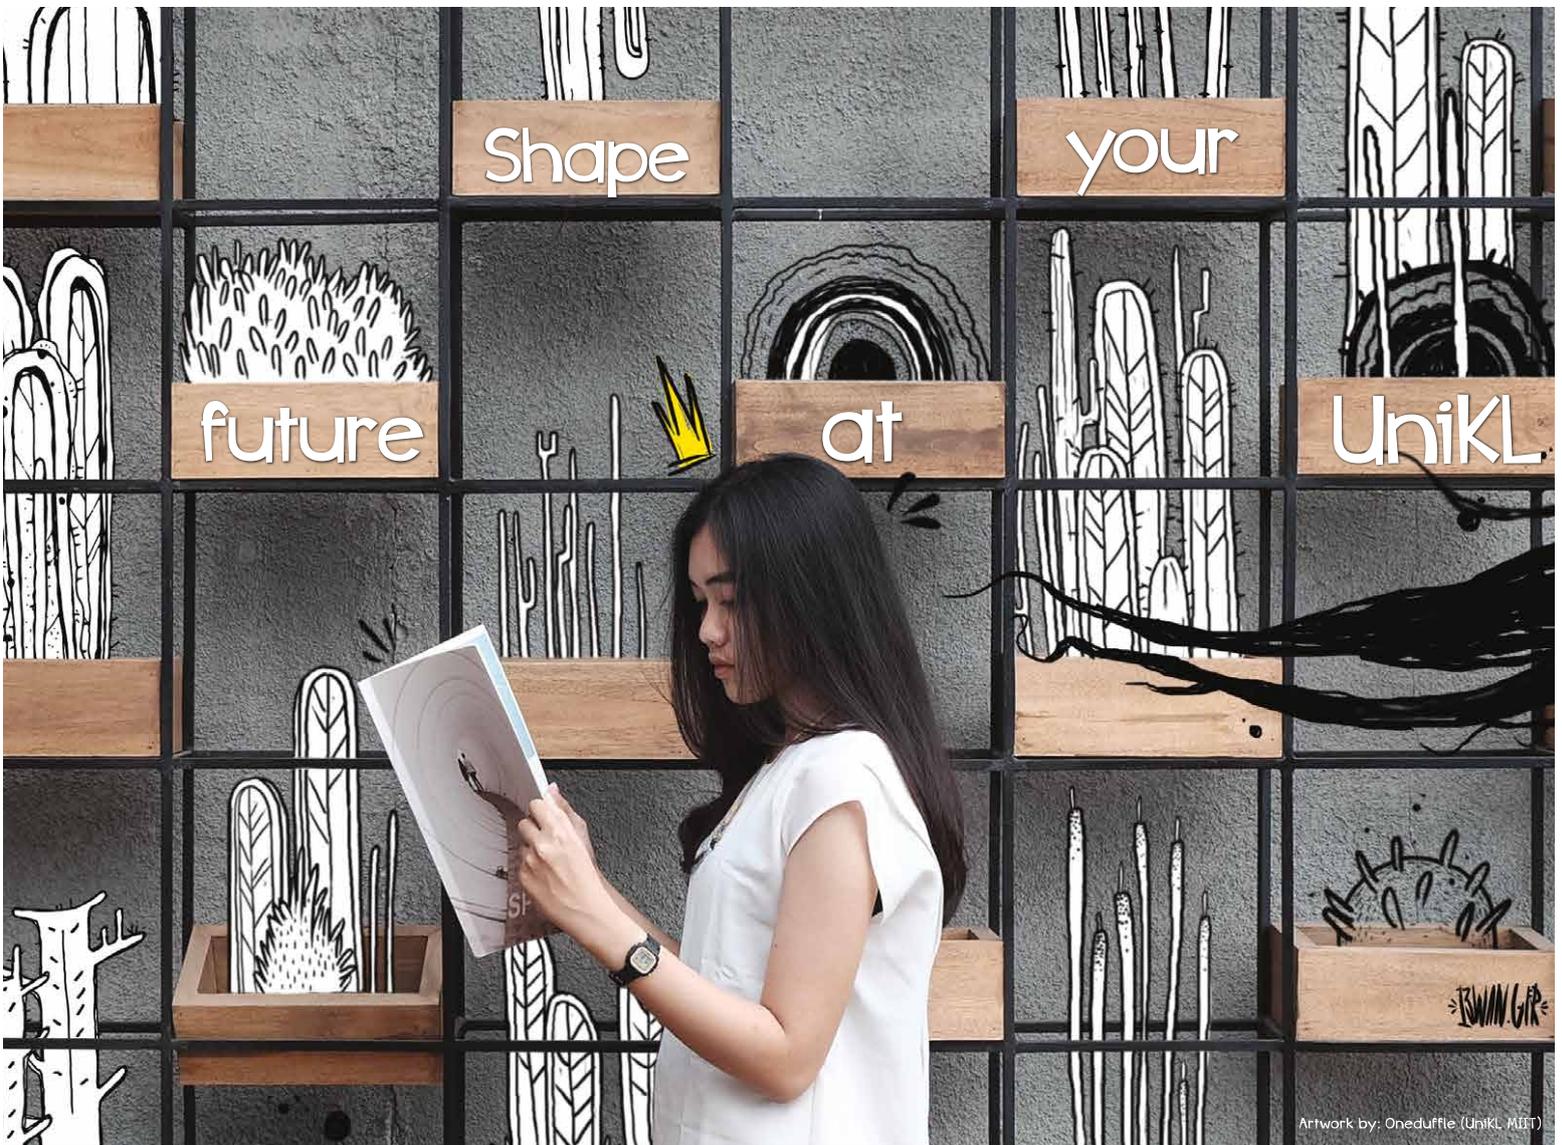

Having produced more than 48,000 graduates since its inception, UniKL strategically posits itself as a leading local institution for technical, vocational and entrepreneurial programmes. UniKL actively champions, markets and spread the message of **Higher Technical and Vocational Education and Training (HTVET)** in its programmes to truly become the apex of technical university for Malaysia.

The philosophy of the university is to offer programmes that meet demands of the global industry, and that students are equipped with all the required knowledge and hands-on industry experience via what is known as *Industrialmanship* - a concept to introduce UniKL students to industrial culture and real working environment from as early as Semester 1 up to the Final Semester, upon graduation and beyond.

UniKL City Campus where the Chancellery is housed, is located in the heart of Malaysia's capital and commerce area, boasting the tallest University Tower in the country - a 31-story building situated at the heart of the Golden Triangle of Kuala Lumpur. The other 11 campuses are spread all over Peninsular Malaysia where every campus has its own specialisation with the concept of **'One Campus, One Specialisation'**.

Beyond the general and technical education delivered on campus, UniKL delivers a competitive and dynamic vocational education through strong partnerships with industries and research institutions to apply and commercialise research findings. Today, the university has extensive collaborations with local and international businesses such as Microsoft, Citroen, Aero Bildung, CIMB, CISCO, Hyundai, Oracle and IBM.

As one of its initiatives to improve the delivery in technical education, UniKL has developed its UniKL value-based Higher Technical and Vocational Education and Training (HTVET) model. The four pillars of excellence are: Innovative Teaching and Learning, Quality Curriculum, Academic Professionalism, and Student Talent Enhancement. This model produces human capital who are innovation-driven, entrepreneurial, ethical and professionally skilled in science, technology and trades which is set to make Malaysia a high income nation.

ALTAI STATE UNIVERSITY
Flagship University of Russia

Altai State University is one of the priority members of the University of Shanghai Cooperation Organization (SCO), carrying out a series of network educational programs within the SCO University. The University has a preparatory department for foreign students studying the Russian Language with subsequent admission to the University.

The University has a high institutional capacity in research and innovation fields:

- 16 laboratories in cooperation with The Russian Academy of Sciences
- 4 research institutes
- Asian Expert-Analitical Center
- Microsoft IT Academy
- Cisco Networking Academy
- Big Data Analysis Center

13,5%

International students

348

Bachelor's and Master's Educational programs

30

Joint Educational Programs with Foreign Universities

Engineering Center "PromBioTech" Business Incubator South-Siberian Botanical Garden
Russian-American AntiCancer Center Research Institute of Biological Medicine

Research that Transforms Lives

Biotechnology for food security

"State of the art genetic technology has been developed and successfully applied to corn production improving its: yield, adaptation to climate change and nutritional quality. In the other hand, applying sustainable biotech we have increased food security characteristics for the safe storage of seeds and grains preventing new diseases of the XXist century."

Silverio García, Tec de Monterrey Researcher

**Tecnológico
de Monterrey**

Create | Innovate | Empower

A leading institution of higher education in the United Arab Emirates and across the region, Zayed University is distinguished for its dedication to research and scholarship that seeks to address the needs of a culturally diverse, technologically advanced, and increasingly global environment. We take pride in providing world-class undergraduate and graduate programs to both national and international students across two modern campuses in Abu Dhabi and Dubai.

Some of our research facilities include:

- Assistive Technology Resource Centers
- Cognition & Neuroscience Research Laboratory
- Bloomberg Virtual Trading Labs and CFA Training
- 3D Printing & Robotics Fabrication Laboratory
- Hyperspectral & Instrumentation Laboratories
- Cyber Security and Digital Forensics Laboratories
- Zayed University Center for Educational Innovation
- Marine and Coral Propagation Laboratory

WUR 2019 ranks AU among the top 1000 universities worldwide.

“Top 50 Under 50” names AU as one of the top 150 young universities worldwide.

“Best Student Cities” lists Dubai/Sharjah/Ajman region as the 61st best student destination worldwide.

The Bachelor of Pharmacy degree program of Ajman University, College of Pharmacy and Health Sciences, has been granted Certification by the Accreditation Council for Pharmacy Education.

Engineering Accreditation Commission

Ajman University’s Bachelor of Science programs in Biomedical Engineering and Electrical Engineering have been accredited by the Engineering Accreditation Commission of ABET.

QS Stars

Helping prospective students find their perfect fit

When the QS World University Rankings first emerged in 2004 they responded to an urgent need: providing a rapidly-growing contingent of internationally mobile students with a way to form concrete comparisons of university standards across borders.

Yet rankings have their limitations. For one thing, the leading universities that make it into the QS World University Rankings constitute some 5% of higher education institutions worldwide. Rankings are consistently led by elite, research-intensive institutions with a global reach. But there are thousands of universities whose strengths lie elsewhere: the quality of teaching, high employability rates, a truly international campus, excellent facilities, or a commitment to social responsibility. These are some of the diverse aspects of a university's mission that are not necessarily captured by international rankings. So how can such universities receive recognition for the areas in which they excel?

QS Stars is the answer - a rating system which exists to give students a way of forming a more comprehensive comparison of universities than can be achieved by looking at rankings alone.

The system is opt-in, meaning that an unlimited number of universities can participate – high-profile institutions that already feature prominently in rankings, as well as lesser-known universities that nonetheless offer excellent services in other areas.

What is QS Stars?

QS Stars is an evaluation system that assesses universities worldwide using a rating method. Universities are assessed across twelve categories and awarded a rating of One to Five Stars+ (the highest rating), depending on their performance in the evaluation.

Which universities use QS Stars?

QS Stars is an opt-in system, meaning participating universities choose to undergo a comprehensive audit, conducted by the QS Intelligence Unit. Since the system was launched in 2010, more than 400 institutions have participated in the QS Stars rating process.

Institutions range from world-leading universities such as MIT and Australian National University, to newer, less internationally-established universities in less mature higher education systems, who nonetheless seek to benefit from the benchmarking and

evaluation opportunity provided.

With new universities opting into the system on a weekly basis, the list of QS Star-related institutions is continually growing. From Latin America, it includes Tecnológico de Monterrey (ITESM), Universidade Estadual Paulista Julia de Mesquita Filbo (UNESP), Universidad de las Americas de Puebla (UDLAP), Universidad de Las Americas Chile (UDLA), Universidad Andres Bellow (UNAB), Universidad Pontificia Bolivariana (UPB), and more than 20 others.

Universities are evaluated in several criteria in at least eight of the following categories:

- Research
- Teaching
- Employability
- Facilities
- Online/Distance Learning
- Internationalization
- Innovation
- Social Responsibility
- Inclusiveness
- Arts & Culture
- Subject Ranking
- Program Strength

Each category has its own indicators and weightings.
QS Stars by the Numbers

- 2010 The year QS Stars was launched
- Over 400 universities have taken part in QS Stars
- More than 60 countries have had at least one QS Stars-rated institution
- 40% The proportion of Latin American countries that have had at least one QS Star-rated institution
- 4.3 Average number of new QS Stars participants per month since its inception

QS Stars - Testimonials

"QS Stars have been very useful to find areas of opportunity inside our university, as well as to improve the services we offer to the students. It has helped Tecnológico de Monterrey increasing the recruitment of international students, and developing relations with international universities as well as sharing our experiences with them. The QS Stars Development RoadMap has also allows us to know our strengths, identify our weaknesses, and work on both on our yearly planning process".

Francisco Javier Cantú, Director of Research at Tecnológico de Monterrey

"QS Stars has illuminated a plethora of activities that we need to review in order to retain our place in the top 100. We found that the exercise of going through the Stars is very useful in helping us to identify gaps in the information we have, and find ways of obtaining it"

Pamela Moss, Director of Planning at the University of Auckland

Reimagine Education Conference & Awards

Introducing the most innovative, industry-leading teaching and learning practices to enhance teaching quality in higher education.

- 1 Cultivate transformative global partnerships
- 2 Connect with top educational innovators
- 3 Learn how to enhance your university's teaching practice

INSIGHTS INTO YOUR PERFORMANCE IN RANKINGS

DATA ANALYTICS • QS STARS RATING • CONSULTING SERVICES

Turn data into insight to boost your position in rankings by:

*Understanding and optimizing
your reputational strategy*

*Identifying and maximizing
existing strengths*

*Implementing frameworks for
performance improvement*

*Enhancing your branding among
prospective stakeholders*

*Improving your visibility and
connections in key markets*

*Developing a sustainable and
high-impact global strategy*
